Newport News Meter Reading Route Restructure Project

If you live in or near the areas listed below, this is the ***best estimate*** of how your March/April water bill may be affected by the meter reading route restructuring project. Please note that your average bi-monthly bill covers about 60 days of water use. The March/April billing cycle may be noticeably above or below the average 60 days, however, this is a ONE-TIME occurrence and your bill should return to a normal 60-day cycle in May/June. Thank you for your patience and understanding.
