Addendum 7

It is agreed and understood that this addendum shall be made part of the original IFB document. It provides responses to questions asked.

The bid due date remains unchanged.

Acknowledge and return with bid.

Company Name: _____

Signature: _____ Date: _____

Question 1:

For this Bid, do you or do you not want the existing Annex operational features on the new Public Safety Building touch screen?

Answer 1:

The existing annex Touchscreen (TSC) in PSB is to be updated with the new PSB screens; the existing annex TSC in the annex will not be touched. The owner will benefit if the new PSB TSC will have the existing annex screens installed.....this way it can double used as a backup. Thus, question 1 will be “YES” we do.

Question 2:

For this bid, do you or do you not want the new Public Safety Building operational features on the existing Annex touch screen?

Answer 2:

“Yes, but only in PSB.”

It is stated in Addendum # 5 that these operational features will be “in the future” regarding “back-up” controls for either touch screen for either building.

If either answer is yes to the questions above, then the following will need to be supplied for an accurate bid:

Question A:

The WonderWare Tag count and what version type on the existing Annex Touch Screen Control unit in the PSB control room.

Answer A:

Ver. WW9.5, <10K tag count

Question B:

The make and model of the intercom amplifier located within the current console for the Annex Touch Screen in the PSB control room.

Answer B:

Dukane 9A-1875B intercom amp

Question C:

The make and model of the network switch located within the current console for the Annex Touch Screen in the PSB control room.

Answer C:

Switch is a 3COM 16 port Fast Ethernet.
