

Welcome New Customer

For more than 100 years, Waterworks has been delivering drinking water to communities on the Virginia Peninsula. We have a talented team of water utility professionals who take great pride in providing high-quality water and exceptional service, using the most advanced technology available, and we'll put our expertise to work for you every day. Be assured that Waterworks is able to meet your water needs dependably and efficiently, day and night. We're pleased to welcome you to the Waterworks community, and we look forward to providing you with reliable water service for years to come.

Quality

You can trust that your water is safe because Waterworks operates a fully-staffed water quality laboratory. This lab, certified by the Virginia Department of Health, is located at our Harwood's Mill Water Treatment Plant in York County.

Your water will be sampled on a consistent schedule and tested in accordance with state and federal regulations.

Each spring, we'll mail you a Water Quality Report, providing information about your water system and our test results from the previous calendar year. Your Water Quality Report will be included with your regular water bill.

We will also post the results on our web site, and we'll put printed copies in local libraries.

If you ever have a water quality concern, please call Customer Service at 926-1000.

Reliability

Waterworks has a highly-trained staff available to serve you 24 hours a day.

If you have questions about your bill, or if you experience any problems with your tap water, including taste and odor concerns or low pressure/low flow problems, simply call us at 926-1000. Our experienced Customer Service Representatives will be ready to assist you, Monday through Friday between 8 a.m. and 5 p.m. Most problems can be solved very quickly. In fact, the majority of our repairs are completed in less than two hours.

If a problem occurs after regular business hours or on a weekend or holiday, you don't have to worry. We have an emergency dispatcher on duty. Just call us at 234-4800.

Please remember that this line is for after-hours emergencies only. Non-emergency situations called in after regular business hours will be handled on the next regular workday.

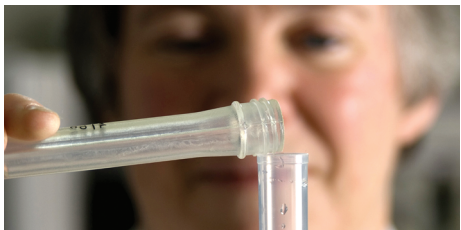

Community

Water Conservation

Waterworks encourages wise water use at all times of the day and at all times of the year. We are a charter member of the Hampton Roads Water Efficiency Team (www.hrwet.org) — look for our traveling water conservation trailer at local and regional festivals. As a partner in the United States Environmental Protection Agency's WaterSense program (www.usepa.gov/watersense) we encourage you to use water-saving WaterSense fixtures and appliances in your home.

Emergency Preparedness

In case of emergency, we have generator back-up, providing water treatment and flow during area-wide power outages. However, Waterworks recommends that all customers store water for unexpected events, especially during hurricane and winter storm seasons.
